TackStop

Window Film Tack Control Solution

A professional evaporation-control concentrate added to your existing slip solution. It slows water evaporation on heated glass so film stays slideable 3–5× longer — eliminating premature tack on hot glass, in dry conditions, and with aggressive-adhesive films.

TECHNICAL SPECIFICATIONS

PRODUCT TYPE	Evaporation-control concentrate (slip-solution additive)
WORKING TIME EXTENSION	3–5× longer than standard slip solution
STANDARD DILUTION	1:128 — 1 fl oz per gallon of slip solution
MECHANISM	Hygroscopic compounds slow water evaporation on heated glass
PHYSICAL STATE	Colorless to slightly milky liquid
EFFECT ON FILM CLARITY	None — evacuates fully through adhesive during cure
CURE / EVACUATION WINDOW	30–140 days (standard film cure)
RESIDUE	Zero residue
PH LEVEL	6.0–7.5 (neutral)
FILM COMPATIBILITY	All PSA (pressure-sensitive adhesive) film systems, including 4–17 mil security film
SHELF LIFE	18 months unopened · 12 months after opening
COUNTRY OF ORIGIN	Made in USA
PATENT STATUS	Patent Pending (U.S.)

TEMPERATURE-BASED DOSING GUIDE

STANDARD 85–110°F 1 oz/gal RATIO 1:128 Normal installations — start here.	HOT >110°F 2 oz/gal RATIO 1:64 Extreme heat or direct sun exposure.	COOL <85°F Reduce RATIO < 1:128 Mild or shaded conditions — dial it back.
--	---	---

HOW TO USE

1 Add to Slip Solution	2 Apply as Normal	3 Position With Confidence	4 Squeegee & Finish
---	------------------------------------	---	--

Mix 1 oz per gallon into your existing slip solution — any standard brand.

Spray the glass and apply film using your usual technique. No new tools.

Film stays slideable 3–5× longer, so you position calmly — no racing the tack.

Full slip through squeegee time. No tack marks, no champagne effect on thick film.

AVAILABLE SIZES

24 fl oz

MAKES ~24 GALLONS OF WORKING SOLUTION

CONCENTRATE

1 Gallon

MAKES ~128 GALLONS OF WORKING SOLUTION

BULK • BEST VALUE

Compatibility test: As with any installation additive, test on a small section first to confirm compatibility with your specific film before full application. TackStop is an additive — not a replacement — and works alongside solutions like InstaSlip.
